BRAINCHILD®

SecureLearn Hub

Empowering Secure, Accessible
Education in Correctional Facilities

Product Overview

The **Brainchild SecureLearn Hub (BSLH)** is a self-contained, offline educational device crafted specifically for correctional facilities and jails. This secure device provides access to Brainchild's comprehensive educational programs without requiring internet access, designed to enhance learning opportunities in highly regulated environments.

Key Features and Benefits

Comprehensive Educational Programs:

- Achiever: Standards-based curriculum support to keep students on grade level.
- Mechanics: A tool for building foundational skills and addressing knowledge gaps.
- GED, HiSet, TABE, and CASAS Preparation: Targeted instructional content to prepare students for high school equivalency exams and skills assessments.

Completely Offline Operation:

- No Internet Access Needed: The BSLH operates independently from the internet, keeping data secure and preventing unauthorized access.
- Secure Data Storage: All user information (e.g., scores, names) is stored locally on the device and never leaves the facility.

Simple Setup and Maintenance:

- Network Integration: Connects to your facility's local area network (LAN) with a simple loop-back rule, allowing seamless access within your intranet.
- Pre-Configured for Your Needs: After a brief consultation with your IT team, the device is shipped configured to fit your facility's specific requirements.
- Easy USB Updates: Updates provided up to three times a year. Insert the USB, press a button, and the update is completed automatically.
